               E
What we need to receive

I believe we need a hero to step boldly from the shadows
You believe there must be someone on the scene that fits the bill
A man or a woman who knows how to say I'm sorry
With courage in his heart to match his creed
A leader who can build a brand new morning
And match the tide of changes
Match the intent with the deed

We believe there's a deed of obligation
To bring reconciliation
To make peace with every nation - in our time
We believe there's not a minute we should be wasting
When the darkness falls it's too late to fix the crime
It's peace that we need
That's what we believe

And the pain we give is the legacy in the end we get

We believe there's a song that's worth the singing
```

It's a song of truth we're bringing
There's a way to share the Earth with everyone
We believe every creature has to be
Has a right to respect and feeling
To live and breathe and flourish in the sun

That's what we believe
